Contractor Spotlight – EnviroVac

Nutrien Aurora would like to take this opportunity to recognize one of our onsite Contractors, EnviroVac Holdings LLC. The employees that work on our site were recently recognized by their company for achieving an Injury Free Workplace for the last two years and nine months. They have also not received any MSHA citations in the last three years.

EnviroVac has been on our site since 2001 performing various cleaning services. They started doing industrial cleaning with shotgun hydroblasters. With safety being a priority and due to advancements in technology, the company is providing cleaning services now that are hands-free. In 2012, EnviroVac became committed to optimizing safety directives and working towards becoming a Carolina STAR Site. In 2014, after a couple of years of hard work and dedication EnviroVac received their NC Star certification.

EnviroVac conducts a 20-minute safety meeting every morning, with each employee tasked with leading that discussion. At the conclusion of the meeting, EnviroVac has a group prayer before leaving the office to start daily work. Once in the field, they walk the job and identify job hazards and make sure they have the proper tools and PPE for the job.

EnviroVac Aurora uses a database (HIS platform) which allows them to track leading indicators, lagging indicators and training. They use HIS to house audits performed, generate lessons learned for sharing, create training, and develop SOP's. In addition, they also have QR stickers on the back of every employee's hardhat, making it quick and easy to report both safe work observations and safety hazards directly to their corporate office.

EnviroVac Aurora is committed to sending all employees home safely every day!

Please leave posted on Bulletin Board thru July 7, 2023

"Safety Has No Quitting Time" – James Jefferson, 2023 Safety Slogan Winner
